

Lesson 14 - factors, multiples and primes

Mild

1) List all the factors of each number

a) 24

b) 36

c) 40

d) 18

2) Circle the prime numbers

9 11 15 17 21 23 29 33

3) Write the first five multiples

a) of 6: _____

b) of 9: _____

c) of 4: _____

Lesson 14 - factors, multiples and primes

Spicy

1) Common factors and multiples

a) List the common factors of 24 and 36, then circle the highest.

b) Lowest common multiple of 4 and 6:

c) Lowest common multiple of 6 and 8:

2) Sort these numbers into the diagram

4 9 16 20 25 36 40 49 64

3) True or false?

“Every multiple of 6 is also a multiple of 3.” Explain how you know.

Lesson 14 - factors, multiples and primes

Hot

1) Draw a prime factor tree for each number

a) 60

b) 72

c) 84

2) Reasoning

a) A number has **exactly three** factors. What can you say about it? Give two examples.

b) Which numbers below 30 have an **odd** number of factors?

Investigate

Omar says: *“Every number has an even number of factors, because factors come in pairs.”*

Layla says: *“Not 16.”*

List the factors of 16, 25 and 36. Who is right, and why do square numbers break the rule?
