

Lesson 7 - Remainders in context

Mild

1) Circle: round UP, round DOWN, or use a DECIMAL

a) 17 children need cars. Each car holds 4.
UP / DOWN / DECIMAL

b) 25 sweets shared between 4 friends.
UP / DOWN / DECIMAL

c) 31 eggs packed in boxes of 6.
UP / DOWN / DECIMAL

d) 19 books placed on shelves of 5.
UP / DOWN / DECIMAL

e) 50 dirhams shared among 4 people.
UP / DOWN / DECIMAL

2) Solve and write the answer in context

a) 38 apples into bags of 5 = ?

b) 29 pens into boxes of 4 = ?

c) 43 chairs into rows of 6 = ?

Lesson 7 - Remainders in context

Spicy

1) Solve. Decide: whole number or decimal?

a) 578 dirhams shared equally among 4 friends.

b) 135 pupils on minibuses that hold 8 pupils each.

c) 247 tiles needed. Sold in boxes of 6.

d) 964 dirhams split between 5 family members.

e) 1825 g of flour shared into 8 equal bags.

2) Explain your choice

For any two problems above, write one sentence saying why you rounded up, rounded down, or used a decimal.

Lesson 7 - Remainders in context

Hot

1) Solve the multi-step problems

a) 1346 passengers need to travel by bus. Each bus holds 48 passengers. How many buses are needed?

b) A baker makes 2753 cookies and packs them into boxes of 12. How many full boxes? How many cookies are left over?

c) 3485 dirhams raised at a school fair are split equally between 16 charities. How much does each charity receive?

Investigate

A ferry carries 32 cars per trip. How many trips are needed to carry:

500 cars? 501 cars? 510 cars?

What pattern do you notice? Explain why.
